At bluefundassets.org Investments, our vision, mission and core values serve as the catalyst in our relations with our clients, employees, shareholders and in the communities in which we live and work. They are our guiding compass in our business each day.

What is decentralization?

In blockchain, decentralization refers to the transfer of control and decision-making from a centralized entity (individual, organization, or group thereof) to a distributed network. Decentralized networks strive to reduce the level of trust that participants must place in one another, and deter their ability to exert authority or control over one another in ways that degrade the functionality of the network.

We're proud to be an asset management company whose culture is driven by strong values and a long-term vision.

What We Do

What We Do

We're proud to be an asset management company whose culture is driven by strong values and a long-term vision. Investment involves risk. The value of investments, and the income from them, can go down as well as up and an investor may get back less than the amount invested. Past performance is not a guide to future results.

What We Do

bluefundassets.org was founded on a simple but revolutionary idea that an investment company should be run for the sole benefit of its investors. And so bluefundassets.org was designed to be different, removing outside owners and outside interests from the equation. Because of our investor-owned structure, bluefundassets.org success can only be measured by your success.

Low costs, a long-term orientation, and focus on your goals are at the core of bluefundassets.org investing philosophy, and not just because they sound good. They're essential to our approach because they're essential to the thing that really matters to you: the opportunity for investment success. So however you shape your portfolio, you can be sure that these principles run through everything we do.

bluefundassets.org mission is to help investors reach their goals, and that means access to advice that works for you. Whether through our own advisory services or supporting financial advisors, we stand firm in our belief that all investors deserve advice that can be trusted and puts your interests first. That's why we seek to provide the advice offerings you need to build your financial future.

Strategy matters. bluefundassets.org approach to managing investments on behalf of our clients is to combine an in-depth appreciation of their unique circumstances and objectives with the investment capacity of a large-scale institutional investor. That means knowing when to apply traditional strategies and when to deviate to ensure consistent, strong risk-adjusted returns.

A departure from conventional economic, political, and social systems run by a handful of large centralized institutions, digital currencies are powered by millions of peers within a globally distributed network, democratizing information and value in incredible new ways. Several digital currencies, each with unique comparative advantages, may radically transform legacy systems across nations and industries around the world, driving future economic growth and becoming more valuable as the keys to our digital, global economy.

At bluefundassets.org, we believe investors deserve an established, trusted, and accountable partner that can help them navigate digital currency investing. That's why we are building transparent, familiar investment products that facilitate access to this burgeoning asset class, and provide the springboard to investing in the new digital currency-powered "internet of money."

PAMM AND MAM ACCOUNT

PAMM (Percentage Allocation Management Module or sometimes Percentage Allocation Money Management) is a popular Forex broker extension that allows traders and asset managers to manage investors' money. Money Managers trade Forex accounts of the Investors via PAMM/MAM. The module simplifies and secures the relations between Investors and the Broker.

The PAMM/MAM investment package is a unique product that allows investors to earn without having to actually trade Forex themselves. You can invest in the Forex PAMM/MAM investment package, bluefundassets.com will receive a percentage of the profits they earn from trading with your funds as a commission.

The PAMM service has been one of the most in-demand financial instruments in 2020 with a turnover of over \$92Bn during the first nine months of the year. bluefundassets.com continues to improve and refine the service, striving to make it as transparent and understandable as possible for customers. As part of the next stage of operations, the PAMM account rating formula has been upgraded.

The method used to calculate the growth rate for a specific period has been updated in order to exclude being placed in the top rating of PAMM accounts that have not been traded for a long time. Now, the final calculation of positive growth for a specific period will not include data for the most recent period:

- An annual calculation will not include the last quarter
- A six-month or quarterly calculation will not include the last month
- A Weekly calculation will not include the last week

Please be advised that calculations using the updated rating formula will begin on the 28th of October at 13:00 (GMT+3). You are kindly requested to take this information into account when planning your trading and investment activity.
